### DETAILED ACTION

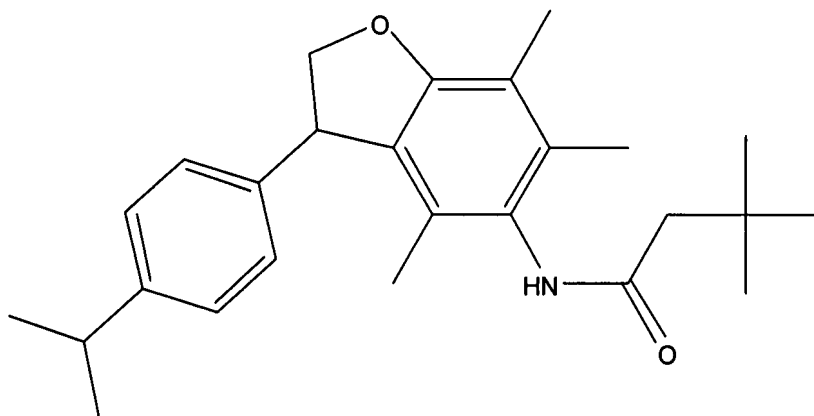

**Status of the claims:** Claim 1 is currently pending. Claim 1 was amended and claims 2-39 were cancelled in the amendment filed on 7/2/07.

**Priority:** This application is a 371 of PCT/JP04/09355 (06/25/2004) and claims foreign priority to JAPAN 2003-182039 (06/26/2003). The required certified priority documents (and if necessary an English translation) are not in the application file. In order to perfect this priority claim applicant must provide the required documents.

**IDS:** The IDS dated 7/6/07 has been considered.

### *Election/Restrictions*

1. Applicant's election without traverse of group I in the reply filed on 7/2/07 is acknowledged. Applicant has also elected the species:

N-(3-(4-isopropylphenyl)-4,6,7-trimethyl-2,3-dihydro-1-benzofuran-5-yl)-3,3-dimethylbutanamide

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated

Art Unit: 1626

by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1-30 of copending Application No. 11/822,941. Although the conflicting claims are not identical, they are not patentably distinct from each other because in claim 30 the first compound listed is the same as in the instant claim 1, furthermore the genus of the claimed subject matter and the disclosure in the specification in the copending application are such that one of ordinary skill in the art would find one obvious over the other.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### **Conclusion**

The sole claim of the application is rejected.
